

SOFTWARE DEVELOPMENT AGREEMENT

Project: FlipLocker — Card Transaction Verification Platform

This Software Development Agreement (this “Agreement”) is entered into as of the date of the last signature below (the “Effective Date”) by and between:

LVXG Brand Group, LLC, a Texas limited liability company, by its Founder, **Jason Dees**, 295 E. Renfro St., Burleson, Texas 76028 · parker@lvxgbrands.com (“**Developer**”); and

Don Smith, 1120 Vistaview, Burleson, Texas 76028 · 817-609-2001 · dons.ynm@gmail.com (“**Client**”).

1. The Project

Developer will design, build, and launch the **FlipLocker** web platform (at the domain **fliplocker.app**) — a card transaction verification and logistics platform — as described in **Appendix A (Functionality List)**, attached and made part of this Agreement. The project includes brand identity design, the web platform per Appendix A, launch deployment, six (6) months of post-launch technical support, and one (1) year of web hosting.

2. Price & Payment Schedule

The total fixed price is **\$9,600.00 USD**, invoiced via PayPal:

Due	Amount	Milestone
Upon signing	\$5,000.00	Retainer / down payment — project start
July 21, 2026	\$2,300.00	View Demo milestone (live demo of the core transaction flow)
August 1, 2026	\$2,300.00	Final payment — pre-launch delivery

Invoices are due on receipt. If an invoice remains unpaid more than three (3) business days past its due date, work pauses and all remaining dates, including launch, extend day-for-day until payment is received.

3. Schedule

This is a 30-day expedited engagement with a target launch of **Thursday, August 6, 2026**, which assumes: (a) the retainer is received by July 8, 2026; (b) Client provides the requested business

information and materials within the first eight (8) days; and (c) Client responds to weekly demos and questions within two (2) business days. The Parties will hold a weekly phone or video review. Delays caused by (b) or (c) extend the schedule day-for-day.

Payment processing approval: Live payment processing requires PayPal's approval of Client's business account for PayPal's platform/marketplace program. Developer will submit the application at kickoff and build against PayPal's test environment in the meantime. PayPal's approval timeline is outside Developer's control; if approval is not received by launch, the platform launches on schedule and live payments are enabled when PayPal grants approval.

4. What's Included / Third-Party Costs

Included at no additional charge: brand identity design; six (6) months of technical support after launch (bug fixes, security patches, and minor adjustments — new features are handled as change orders) via Developer's support email; and one (1) year of web hosting. After the first year, hosting continues at Developer's then-current rate or transfers to Client's own account at Client's option.

Client is responsible for third-party accounts and usage costs: PayPal processing fees, shipping postage and shipping-API fees, domain registration, text-message (SMS) delivery fees, and any similar per-use charges. Developer will set up and integrate these services on Client's behalf.

5. Client Responsibilities

1. Provide during the first week: business entity details and PayPal business account access (for the platform application), the service fee amounts for each price tier, and the hub shipping address.
2. Operate the physical hub (facility, staffing, inspection equipment, packing materials, tamper seals, and daily operations).
3. Provide or approve all business policies and site content, including Terms of Service and pricing. Client is responsible for the legal, tax, and regulatory compliance of Client's business model; Developer provides software development services only and does not provide legal or tax advice.

6. Changes

Work not described in Appendix A requires a written change order (email is sufficient) stating the addition, its price, and any schedule impact, accepted by both Parties before the work begins.

7. Ownership

Upon Developer's receipt of all payments due under this Agreement, ownership of the platform's custom source code, design assets, and brand assets created under this Agreement transfers to Client. Developer retains its pre-existing tools and general know-how, licensed to Client as embedded in the deliverables. Third-party and open-source components remain under their own licenses. Developer may reference the project in its portfolio unless Client requests otherwise in writing.

8. Warranty; Limitation of Liability

Developer warrants the services will be performed in a professional and workmanlike manner. OTHERWISE THE DELIVERABLES ARE PROVIDED "AS IS," AND DEVELOPER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. Developer does not control and is not responsible for the acts, omissions, approval decisions, fees, or availability of third-party services (including PayPal, USPS, and shipping or messaging providers). NEITHER PARTY IS LIABLE FOR INDIRECT OR CONSEQUENTIAL DAMAGES OR LOST PROFITS, AND DEVELOPER'S TOTAL LIABILITY UNDER THIS AGREEMENT WILL NOT EXCEED THE FEES ACTUALLY PAID BY CLIENT.

9. Termination

Either Party may terminate for material breach on ten (10) days' written notice if the breach is not cured within that period. Client may terminate for convenience on written notice; in that case the retainer is non-refundable, Client pays for work performed through the termination date, and Developer delivers the work-in-progress for the amounts paid. Sections 7–8 and 10 survive termination.

10. General

Developer is an independent contractor. This Agreement is governed by Texas law, with venue in Johnson County, Texas. It is the entire agreement regarding its subject matter; amendments must be in writing and signed by both Parties. It may be signed in counterparts and by electronic signature (including DocuSign).

APPENDIX A

FlipLocker Platform — Functionality List

A-1. Overview

FlipLocker is a web platform that verifies and documents peer-to-peer graded trading card deals negotiated off-platform (e.g., on social media). Buyers and sellers bring an agreed deal to FlipLocker; the platform handles payment collection, physical verification at the FlipLocker hub, insured two-leg shipping with signature delivery, and release of the seller's funds on completion. Core rules:

- Buyer payments are collected and **held by PayPal** (the payment processor) and released to the seller when delivery is signed for and the buyer review window closes. FlipLocker's account receives only its service fee.
- FlipLocker hosts no inventory and lists nothing for sale; deals are private and invitation-only. There is no public browsing, search, or listing of items.
- The service fee is a flat amount determined solely by the card's sale price tier. Card market/comp value is not collected or used.

A-2. Brand & Design

Logo and brand identity (colors, typography) for the FlipLocker name provided by Client; clean, modern, mobile-friendly UI applied across all portals and notifications; domain setup support.

A-3. Deal Creation & Seller Portal

- Account registration, login, email verification, password reset.
- Create Deal: card details (sport, year, player, grading company, certificate/serial number), front and rear photos, item description, sale price, and buyer's email. Minimum sale price \$160 enforced automatically.
- Deal dashboard with live status for every deal.
- Prepaid Leg 1 USPS shipping label (seller → hub), generated after the buyer's payment is confirmed, with the label charge billed to the seller (amount configurable).
- 72-hour ship timer: if the package receives no carrier scan within 72 hours of label generation, the deal auto-cancels and the buyer is automatically refunded.
- Alerts at each step, payout status, and PayPal payout account connection.

A-4. Buyer Portal

- Email invitation to the deal; account creation/claim.
- Deal review page: photos, card details, and an itemized checkout (sale price, \$9.50 flat outbound shipping & signature line, and configured fee/insurance/tax lines).
- Accept & Pay via PayPal checkout (funds held by PayPal), or Decline.
- Live tracking of both shipping legs; in-portal viewing of the hub inspection video and photos.
- 48-hour review window after signed delivery: Approve, or Report an Issue; the deal auto-completes if the window passes with no report.

A-5. Payments

- PayPal platform/marketplace (multiparty) checkout: buyer funds held by PayPal and released to the seller automatically upon signature-confirmed delivery plus the 48-hour review window; FlipLocker's service fee routed to FlipLocker at the same time.
- Flat-tier service fee engine driven by sale price brackets (e.g., \$5–\$30), fully configurable by Admin without code changes, including who pays the fee (seller, buyer, or split).
- Configurable insurance line (\$0.50 per \$100 of sale price) passed through from the shipping provider's declared-value coverage.
- Sales tax line configurable by delivery state per Client's tax policy.
- Automatic refund paths: buyer declines, 72-hour ship timer expiry, and failed verification.
- Receipts and a full transaction record for all parties. Live processing subject to PayPal program approval per Section 3.

A-6. Shipping & Tracking

- USPS labels via shipping API for both legs: Leg 1 (seller → hub, USPS Ground Advantage), Leg 2 (hub → buyer, signature required — never waived).
- Webhook tracking updates displayed on a full deal timeline visible to both parties.
- Signature-delivery event starts the 48-hour review window and then triggers fund release.

A-7. Hub Verification Portal (staff)

- Inbound queue of expected packages; check-in by scanning/entering the tracking number, which opens the matching deal.
- Damaged-packaging photo intake for insurance evidence.
- Upload of the 15-second inspection video (automatically compressed for fast web playback) and two reference photos, attached to the deal.

- Tamper-seal serial number entry, permanently bound to the deal record.
- Pass → repack step and Leg 2 label generation. Fail (condition mismatch) → deal frozen, evidence sent to buyer, return label to seller, automatic buyer refund on carrier scan; seller return-shipping payment link.

A-8. Admin Dashboard

All deals and statuses; fee tier, insurance, and tax configuration; user management; manual overrides (cancel, refund, regenerate label, resolve flagged deals); basic reports (deal volume, fees collected).

A-9. Notifications & Records

- Automated email and text (SMS) alerts at every step of the deal for buyer and seller.
- Terms of Service acknowledgment checkbox required before a seller can generate a label; Client-provided ToS and Privacy pages implemented on-site.
- Automatic media purge: inspection videos deleted 30 days after confirmed delivery.

A-10. Infrastructure

Responsive web application (desktop/tablet/phone); HTTPS throughout; secured cloud storage for photos and video; staging and production environments; launch deployment; first year of hosting included per Section 4.

A-11. Not Included (Available as Future Phases)

- Monthly subscription/membership tiers and recurring billing.
- Hub camera hardware integrations (automatic recording triggers, foot pedals, camera-feed control) — the portal accepts uploads from any camera.
- Native iOS/Android apps (the responsive web app covers mobile use).
- Live-stream, influencer, or marketing platform integrations.
- Additional payment processors beyond PayPal.
