

SOFTWARE DEVELOPMENT SERVICES AGREEMENT

Project: “CardDoc” Transaction-Facilitation Platform

This Software Development Services Agreement (this “Agreement”) is entered into as of **July 6, 2026** (the “Effective Date”) by and between:

LVXG Brand Group, LLC, a Texas limited liability company, by its Founder, **Jason Dees**, with its principal place of business at 295 E. Renfro St., Burleson, Texas 76028 (“**Developer**”); and

Don Smith, an individual, with an address of _____ (“**Client**”).

Developer and Client are each a “Party” and together the “Parties.”

1. Services

Developer will design, develop, and deliver the CardDoc web platform (working title; final brand name to be developed under this Agreement) as described in **Exhibit A — Scope of Work & Functionality List**, on the schedule described in **Exhibit B — Timeline, Milestones & Payment Schedule**, both attached and incorporated into this Agreement (together, the “Services”). The Services include brand naming development, brand identity design, platform development, launch deployment, and six (6) months of post-launch technical support as described in Section 5.

2. Term & Schedule

Work begins on the Effective Date under a 30-day expedited schedule with a target launch date of **August 6, 2026**. The schedule assumes: (a) receipt of the down payment on the Effective Date; (b) Client feedback within two (2) business days of each weekly demonstration; (c) Client's timely provision of the items in Section 6; and (d) third-party approval timelines (including PayPal account approvals) outside Developer's control. Delays attributable to (b)–(d) extend the schedule day-for-day and are not a breach by Developer.

3. Compensation

Client will pay Developer a total fixed fee of **\$7,800.00 USD**, invoiced via PayPal per the following schedule:

Due Date	Amount	Milestone
----------	--------	-----------

July 6, 2026	\$5,000.00	Down payment — signing & project start
July 21, 2026	\$1,400.00	View Demo milestone (demonstration of core transaction flow)
August 1, 2026	\$1,400.00	Final payment — pre-launch delivery

Invoices are due on receipt. If any invoice remains unpaid more than three (3) business days after its due date, Developer may pause work, and the schedule (including the launch date) extends day-for-day until payment is received.

4. Third-Party Services & Costs

The fixed fee covers Developer's design and development services only. Client is responsible for establishing, owning, and paying for all third-party accounts and recurring costs required to operate the platform, including without limitation: web hosting and cloud storage, domain registration, PayPal merchant/processing fees, shipping API fees and postage, and email delivery services. Developer will recommend, configure, and integrate these services on Client's behalf.

5. Included Support

For six (6) months following launch (through **February 6, 2027**), Developer will provide technical support at no additional charge, consisting of: correction of defects and bugs, security patches, uptime monitoring, and minor adjustments that do not add new features. New features, redesigns, or scope changes are handled under Section 7 (Change Orders). Support requests are submitted by Client through the channel designated by Developer and addressed in a commercially reasonable timeframe.

6. Client Responsibilities

1. Provide timely feedback and approvals (within two (2) business days of each weekly demonstration).
2. Provide, during Week 1: the processing-fee schedule, the hub shipping address, access to (or creation of) Client's PayPal business account, and brand-name selections from Developer's candidates.
3. Operate the physical hub (facility, staffing, receiving, video recording, repacking, and outbound shipping operations).
4. Own responsibility for the legality and regulatory compliance of Client's business model — including any laws relating to money transmission, escrow, marketplaces, or consumer

protection — and for the content of Client-facing legal policies. Developer provides software development services only and does not provide legal, tax, or financial advice.

7. Change Orders

Work outside Exhibit A requires a written change order (email sufficient) describing the change, its cost, and its schedule impact, signed or affirmatively accepted by both Parties before work begins.

8. Intellectual Property

Upon Developer's receipt of all payments due under this Agreement, all right, title, and interest in the platform's custom source code, brand name, logo, and design assets created under this Agreement are assigned to Client. Developer retains ownership of its pre-existing tools, libraries, and generalized know-how, and grants Client a perpetual, royalty-free license to any such items embedded in the deliverables. Third-party and open-source components remain subject to their own licenses. Developer may identify the project in its portfolio unless Client requests otherwise in writing.

9. Confidentiality

Each Party will keep the other's non-public business information confidential and use it only to perform this Agreement. This obligation survives termination for two (2) years.

10. Warranties & Disclaimers

Developer warrants the Services will be performed in a professional and workmanlike manner. EXCEPT AS STATED IN THIS SECTION, THE DELIVERABLES ARE PROVIDED “AS IS” AND DEVELOPER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Developer does not warrant or control the approval decisions, timelines, fees, or continued availability of third-party services (including PayPal and USPS/shipping providers) and is not liable for their acts or omissions.

11. Limitation of Liability

NEITHER PARTY IS LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOST PROFITS. DEVELOPER'S TOTAL AGGREGATE LIABILITY UNDER THIS AGREEMENT WILL NOT EXCEED THE FEES ACTUALLY PAID BY CLIENT TO DEVELOPER UNDER THIS AGREEMENT.

12. Termination

Either Party may terminate for material breach on ten (10) days' written notice if the breach is not cured within that period. Client may terminate for convenience on written notice; in that case Client pays for all work performed through the termination date (calculated proportionally against the payment schedule), the down payment is non-refundable, and Developer delivers work-in-progress for the amounts paid. Sections 8–11 and 13–14 survive termination.

13. Independent Contractor

Developer is an independent contractor. Nothing in this Agreement creates a partnership, joint venture, agency, or employment relationship.

14. General

This Agreement is governed by the laws of the State of Texas, with exclusive venue in Johnson County, Texas. It is the entire agreement between the Parties regarding its subject matter and supersedes prior discussions. Amendments must be in writing and signed by both Parties. This Agreement may be executed in counterparts and by electronic signature (including DocuSign), each of which is deemed an original. If any provision is held unenforceable, the remainder stays in effect.

Signatures

By signing below, each Party agrees to the terms of this Agreement, including Exhibits A and B.

EXHIBIT A

Scope of Work & Functionality List — CardDoc Platform

A-1. Platform summary

CardDoc (working title; final name developed under this Agreement) is a web-based transaction-facilitation platform for peer-to-peer trading card sales negotiated off-platform (e.g., social media). Governing business rules:

1. CardDoc does not hold or touch the buyer's purchase money; purchase funds are released to the seller and CardDoc receives only its processing fee.
2. CardDoc hosts no inventory and is not a marketplace or storefront; it is a pass-through verification hub.
3. The processing fee is calculated strictly from the agreed sale price. The card's comp/market value is not collected and is never used.

A-2. Brand & identity (included)

Brand naming development (candidates, domain and basic availability screening, final selection with Client); logo design with variations; color palette and typography; brand application across platform UI and email templates.

A-3. Seller Portal

Account registration/login with email verification and password reset. Create Deal flow: upload front photo and rear photo of the card, item description, sale price, and buyer's email — creating the deal automatically alerts the buyer. Deal dashboard with live statuses. Alerts when the buyer accepts, when payment is captured (“ship now”), and at each shipping/verification step. Prepaid USPS shipping label (seller → hub) generated in the system after payment capture. Live tracking. Payout status and PayPal payout account connection.

A-4. Buyer Portal

Email invitation and account claim. Deal review page with both photos, description, sale price, and full cost breakdown. Accept and Decline buttons. PayPal checkout using authorize & capture upon acceptance. Live tracking of both shipping legs, access to the hub's unboxing video and two verification photos, and visibility of the signature-confirmed delivery event.

A-5. Payments (PayPal)

PayPal integration on the authorize & capture model. Payment structured so CardDoc receives only its processing fee, with the purchase amount disbursed to the seller automatically upon signature-confirmed delivery (PayPal multiparty/delayed-disbursement configuration, subject to PayPal's approval of Client's business account). Fee engine computes the processing fee solely from sale price, with the fee schedule configurable by Admin. Receipts and transaction records; void/refund handling for declined, cancelled, or flagged deals.

A-6. Shipping & tracking

USPS label generation via shipping API for both legs — Leg 1 (seller → hub) and Leg 2 (hub → buyer, with Signature Confirmation required). Webhook-driven tracking updates displayed on the deal timeline for both parties. Signature-confirmed delivery automatically triggers release of seller funds and the CardDoc processing fee.

A-7. Facilitator Hub Portal

Inbound package queue and check-in by tracking number. Unboxing video upload (evidence the correct card was shipped). Two still-photo uploads attached to the deal. Verification confirm step with an exception path (mismatch → deal flagged, Admin notified, refund workflow). Repack step generating the signature-required outbound label. All actions timestamped on the deal's chain-of-custody timeline.

A-8. Admin dashboard

All deals with statuses, participants, and amounts; fee schedule configuration; user management; manual overrides (cancel, refund, regenerate label, resolve exceptions); basic reporting (deal volume, fees collected).

A-9. Notifications & transparency

Automated transactional email at every lifecycle step. Every deal shows a full timestamped status timeline visible to seller and buyer: Created → Buyer Notified → Accepted → Paid → Awaiting Seller Shipment → In Transit to Hub → Received at Hub → Verified → Repacked → In Transit to Buyer → Delivered & Signed → Funds Released → Complete (plus Declined / Cancelled / Refunded / Flagged exception states).

A-10. Infrastructure & support

Responsive web application (desktop/tablet/phone browsers); HTTPS throughout; secured cloud media storage; staging and production environments; launch deployment; Terms of Service and Privacy Policy page templates. Six (6) months of post-launch technical support per Section 5 of the Agreement.

A-11. Assumptions & exclusions

1. No card grading, authentication opinion, or valuation; hub verification is video/photographic evidence that the shipped card matches the listing.
2. Native iOS/Android apps are out of scope; the responsive web app covers mobile use.
3. Ongoing third-party costs are Client's responsibility per Section 4 of the Agreement.
4. Client operates the physical hub and sets the processing-fee amounts (the system makes them configurable).
5. PayPal's approval of multiparty/delayed-disbursement processing is a third-party dependency; if approval is pending at launch, the platform launches with a Developer-proposed interim payment configuration and switches over upon approval.

EXHIBIT B

Timeline, Milestones & Payment Schedule

Week	Dates	Development focus	Weekly demo covers
1 — Foundation & Brand	7/6 – 7/12	Kickoff (fee schedule, hub address, PayPal account); brand naming candidates and design direction; technical foundation, database, and authentication; Seller Portal deal creation with photo uploads; buyer invitation email; PayPal business-account application started.	Fri 7/10: brand candidates and design direction; live seller deal creation with buyer email firing.
2 — Buyer Flow & Payments	7/13 – 7/19	Buyer Portal review page and account claim; Accept/Decline; PayPal authorize & capture (sandbox); fee engine (sale price only); transparency timeline; final brand applied.	Fri 7/17: full core loop — create → notify → accept → sandbox payment → seller “ship now” alert, in branded UI. ★ Tue 7/21: formal VIEW DEMO milestone — \$1,400 invoice.
3 — Shipping & Hub	7/20 – 7/26	USPS label generation (both legs; Leg 2 with Signature Confirmation); webhook tracking on the timeline; Facilitator Hub Portal — check-in, unboxing video upload, two verification photos, repack; shipping/hub notifications.	Fri 7/24: payment-to-doorstep logistics — labels, live tracking, hub check-in, video + photo uploads, signature-required outbound label.
4 — Fund Release, Admin & QA	7/27 – 8/2	Signature-delivery → automatic fund release (seller payout + processing fee); refund/exception paths; Admin dashboard and fee configuration; full end-to-end QA; mobile pass; security review; production environment.	Fri 7/31: complete lifecycle in one sitting including automatic fund release, plus Admin dashboard. ★ Sat 8/1: final payment — \$1,400 invoice.

Launch	8/3 – 8/6	Production deployment, domain/SSL, PayPal live verification, real test transaction, monitoring, Client training for all roles.	 Thu 8/6: LAUNCH. Support window runs through 2/6/2027.
--------	--------------	--	---

Payment schedule

Date	Amount	Milestone
7/6/2026	\$5,000.00	Down payment — signing & start
7/21/2026	\$1,400.00	View Demo milestone
8/1/2026	\$1,400.00	Final payment
Total: \$7,800.00 — includes brand naming development, brand design, platform build per Exhibit A, launch, and 6 months of post-launch technical support (through 2/6/2027).		

Schedule dependencies per Section 2 of the Agreement: down payment on 7/6; Client feedback within 2 business days of each demo; Week-1 delivery of fee schedule, hub address, and PayPal account access; third-party approval timelines (notably PayPal) outside Developer's control.
